

Rank

$N(11,4,5)$

The diagram illustrates a 2D coordinate system with 'Rank' on the vertical axis and 'Sequence' on the horizontal axis. Three nested regions are shown, each defined by a horizontal double-headed arrow indicating its extent along the 'Sequence' axis. The innermost region is a dashed blue oval labeled $N(4,3,1)$. The middle region is a dashed blue oval labeled $N(7,3,3)$ that contains the first region. The outermost region is a solid orange oval labeled $N(11,4,2)$ that contains the other two. Above the orange oval, a horizontal dashed arrow labeled $N(11,4,5)$ spans a wider range. A vertical dashed arrow points upwards from the right side of the orange oval towards the horizontal arrow labeled $N(11,4,5)$.

$N(7,3,3)$

$N(11,4,2)$
